1. Refers to the outside of a circle.
2. Formed by the intersection of a plane and a solid when a plane passes through the solid.
3. Two angles that share a common vertex and a common side.
4. Two or more angles that have equal measures.
5. Simplify expressions by adding or subtracting like terms.
6. Sum of their angle measures is equal to 90°.
7. Amount of money a salesperson earns after selling a product.
8. Single polygon face.
9. Ratio between two values is always the same or constant.
10. A number or an algebraic expression that is a factor of two or more numbers or algebraic expressions.
11. Change it to an equivalent measurement in different units.
12. Collection of points on the same plane equidistant from the same point.
13. Collection of data from every member of a population.
14. An angle whose measure is greater than 0° but less than 90°.
15. Used for repeating decimals. A bar is drawn of digits that repeat.

convert	bar notation	base of pyramid
congruent angles	acute angle	cross section
complementary angles	adjacent angles	census
circumference of circle	common factor	constant of proportionality
circle	combine like terms	commission
