- 1. Mathematical sentence that is created by placing an equal sign between two expressions.
- 2. Order numbers least to greatest then find the middle value or find average of two middle values.
- 3. In a data set, this is the value(s) that occurs most often.
- 4. Angles on the outside of a triangle.
- 5. Measure of the exterior angle of a triangle is equal to the sum of the measures of the two remote interior angles of the triangle.
- 6. Decimal that continues without end.
- 7. When values vary so that one increases or decreases a specific amount, the other value increases or decreases by a constant.

- 8. Angle whose measure is greater than 90° but less than 180°.
- 9. Average of data set.
- 10. Equal to twice the radius of the circle.
- 11. Result of a single trial of an experiment.
- 12. Largest factor that two or more numbers or terms have in common.
- 13. Two numbers that when multiplied together equal 1.
- 14. Decimal neither terminates nor repeats.
- 15. Average of the absolute values of the deviations of each data value from the mean.

mean	exterior angles	mode
exterior angle theorem	outcome	obtuse angle
non-terminating decimal	non-repeating decimals	diameter
equation	median	greatest common factor
multiplicative inverse	mean absolute deviation	direct variation
