- Mathematical sentence that is created by placing an equal sign between two expressions.
- Order numbers least to greatest then find the middle value or find average of two middle values.
- In a data set, this is the value(s) that occurs most often.
- Angles on the outside of a triangle.
- Measure of the exterior angle of a triangle is equal to the sum of the measures of the two remote interior angles of the triangle.
- Decimal that continues without end.
- When values vary so that one increases or decreases a specific amount, the other value increases or decreases by a constant.
- Angle whose measure is greater than 90° but less than 180° .
- Average of data set.
- Equal to twice the radius of the circle.
- Result of a single trial of an experiment.
- Largest factor that two or more numbers or terms have in common.
- Two numbers that when multiplied together equal 1.
- Decimal neither terminates nor repeats.
- Average of the absolute values of the deviations of each data value from the mean.
