- Equation that states that two ratios are equal.
- Measure of the likelihood that an event will occur.
- Ratio that compares two quantities that are measured in different units.
- Original amount of money invested.
- Entire set of items from which data can be selected.
- Polyhedron formed by connecting one polygonal face to several triangular faces; they are classified by their bases.
- Maximum minus minimum.
- Data from part of a population.
- List of all possible outcomes of an experiment.
- New amount is greater than the original amount. It is a ratio of the amount of increase to the original amount.
- New amount is less than the original amount. It is a ratio of the amount of decrease to the original amount.
- Ratio of the circumference of a circle to its diameter.
- Angle whose measure is equal to 90°.
- Distance from the center of a circle to a point on the circle.
- Comparison of two quantities that uses division.
