1. Ratio of the circumference of a circle to its diameter.
2. New amount is less than the original amount. It10 is a ratio of the amount of decrease to the original amount.
3. Comparison of two quantities that uses division.
4. In statistics it is a characteristic used to describe a population.
5. Decimal in which a digit or a group of digits repeats without end.
6. Maximum minus minimum.
7. Data from part of a population.
8. Original amount of money invested.
9. Equation that states that two ratios are equal.

0 . Distance from the center of a circle to a point on the circle.
11. Measure of the likelihood that an event will occur.
12. Entire set of items from which data can be selected.
13. New amount is greater than the original amount. It is a ratio of the amount of increase to the original amount.
14. Angle whose measure is equal to $90^{\circ}$.
15. List of all possible outcomes of an experiment.
proportion
right angle
principal
pi
sample space
percent decrease
sample
ratio
probability
radius
population
percent increase
parameter
range
repeating decimal
