- Angles on the outside of a triangle.
- Two adjacent angles that have noncommon sides that form a line.
- When values vary so that one increases or decreases a specific amount, the other value increases or decreases by a constant.
- Order numbers least to greatest then find the middle value or find average of two middle values.
- Largest factor that two or more numbers or terms have in common.
- Decimal neither terminates nor repeats.
- In a data set, this is the value(s) that occurs most often.
- Average of the absolute values of the deviations of each data value from the mean.
- Angle whose measure is greater than  $90^\circ$  but less than  $180^\circ$ .
- Average of data set.
- Decimal that continues without end.
- Measure of the exterior angle of a triangle is equal to the sum of the measures of the two remote interior angles of the triangle.
- Circle that fits exactly within the boundaries of another shape.
- Equal to twice the radius of the circle.
- Mathematical sentence that is created by placing an equal sign between two expressions.

inscribed circle

obtuse angle

median

exterior angles

non-repeating decimals

greatest common factor

mean

non-terminating decimal

equation

direct variation

exterior angle theorem

mode

mean absolute deviation

diameter

linear pair
