1. Polyhedron formed by connecting one polygonal face to several triangular faces; they are classified by their bases.
2. Data from part of a population.
3. A sample that is selected from the population in such a way that every member of the population has the same chance of being selected.
4. New amount is less than the original amount. It is a ratio of the amount of decrease to the original amount.
5. Angle whose measure is equal to $90^{\circ}$.
6. Ratio that compares two quantities that are measured in different units.
7. List of all possible outcomes of an experiment.
8. Ratio of the circumference of a circle to its diameter.
9. Original amount of money invested.
10. Comparison of two quantities that uses division.
11. Distance from the center of a circle to a point on the circle.
12. In statistics it is a characteristic used to describe a population.
13. New amount is greater than the original amount. It is a ratio of the amount of increase to the original amount.
14. Decimal in which a digit or a group of digits repeats without end.
15. Measure of the likelihood that an event will occur.

| random sample | percent decrease | principal |
| :--- | :--- | :--- |
| sample | percent increase | right angle |
| pyramid | repeating decimal | parameter |
| sample space | radius | ratio |
| probability | pi | rate |
