1. Collecting information about a certain group of people.
2. Fixed percentage of the principal.
3. Requires that two inverse operations be performed in order to isolate the variable.
4. When two numbers are added/multiplied together, the sum/product is the same regardless of the order.
5. Representations of real objects or places that are in proportion to the objects or places they represent.
6. Sum of their angles is equal to 180º.
7. A characteristic used to describe the sample.
8. States that the sum of the measures of the interior angles of a triangle is 180º.
9. Ratio of side lengths in an enlargement to those of the original figure.
10. Terms in an expression may be expanded in a particular way to form an equivalent expression.
11. Angle whose measure is equal to 180º.
12. States that the sum of the lengths of any two sides of a triangle is greater than the length of the third side.
13. Event consisting of one outcome.
14. Amount the dependent value changes for every unit the independent value changes.
15. Two nonadjacent congruent angles that are formed by two intersecting lines.

commutative property
triangle sum theorem
simple interest
distributive property
straight angle

supplementary angles
scale factor
triangle inequality theorem
two-step equation
simple event

vertical angles
statistic
unit rate of change
survey
scale drawing
