1. Sum of their angle measures is equal to $90^{\circ}$.
2. Number that is multiplied by a variable in an algebraic equation.
3. Collection of points on the same plane equidistant from the same point.
4. Two or more angles that have equal measures.
5. Collection of data from every member of a population.
6. Mathematical phrase involving at least one variable and sometimes numbers and operation symbols.
7. Simplify expressions by adding or subtracting like terms.
8. An angle whose measure is greater than $0^{\circ}$ but less than $90^{\circ}$.
9. Refers to the outside of a circle.
10. A number or an algebraic expression that is a factor of two or more numbers or algebraic expressions.
11. Angles that have the same relative position in geometric figures.
12. Amount of money a salesperson earns after selling a product.
13. Formed by the intersection of a plane and a solid when a plane passes through the solid.
14. Two angles that share a common vertex and a common side.
15. Used for repeating decimals. A bar is drawn of digits that repeat.
algebraic expressions
coefficient
common factor
adjacent angles
census
acute angle
cross section
circle
circumference of circle
corresponding angles
bar notation
congruent angles
commission
combine like terms
complementary angles
