

8th Grade CCSS Math Vocabulary Word Search 6

1. First, write the correct clue number to the left of each word in the Word Bank. Then, circle the words that have been hidden vertically, horizontally, and diagonally.

1. Identical in shape although not necessarily the same size.
2. The result of infinitely many applications of a recursive procedure to a geometric figure.
3. Indicates how many times the base is to be used as a factor.
4. A symbol for an unknown number usually expressed as a letter.
5. An expression used to calculate a desired result.
6. The set of y-values of a function or relation.
7. To find the value of an expression.
8. Mathematical sentences built from expressions using one or more equal signs.
9. A figure in which part of the figure has the same shape as the whole figure.
10. The set of x-values that give rise to real y-values.
11. 2 points on a line (endpoints) and all the points between them on the line.
12. A measure of the steepness of a line on a graph.
13. A point at which a graph intersects the y-axis.
14. An angle on the interior of a plane figure.
15. Angles that have the same position on two different parallel lines cut by a transversal.
16. Not ordered and unpredictable.
