- 1. Identical in shape although not necessarily the 9. A figure in which part of the figure has the same size.
- 2. The result of infinitely many applications of a recursive procedure to a geometric figure.
- 3. Indicates how many times the base is to be used as a factor.
- 4. A symbol for an unknown number usually expressed as a letter.
- 5. An expression used to calculate a desired result.
- 6. The set of y-values of a function or relation.
- 7. To find the value of an expression.
- 8. Mathematical sentences built from expressions16. Not ordered and unpredictable. using one or more equal signs.

- same shape as the whole figure.
- 10. The set of x-values that give rise to real yvalues.
- 11. 2 points on a line (endpoints) and all the points between them on the line.
- 12. A measure of the steepness of a line on a graph.
- 13. A point at which a graph intersects the y-axis.
- 14. An angle on the interior of a plane figure.
- 15. Angles that have the same position on two different parallel lines cut by a transversal.
