

Kindergarten CCSS Math Vocabulary Matching 15

Write the word that best matches each definition or clue.

1. _____ A solid shape with 2 circle faces and rolls.
2. _____ A solid shape with a circle face that comes to a point.
3. _____ To put into a group based on features, qualities, properties, and attributes.
4. _____ Counting from lowest to highest or first to last.
5. _____ A solid three-dimensional figure which has 6 square faces, 8 vertices, and 12 edges.
6. _____ Joins one vertex with another.
7. _____ Less than the one that is greater.
8. _____ The plural (more than one) word for vertex. A vertex is a point where 2 sides come together. Vertices are more than one vertex.
