

5th Grade Science Vocabulary Crossword Puzzle 7

1. Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

1. The process of wind or water breaking down rock into soil, sand, and other tiny pieces.
3. A trait passed on from one generation to another such as eye color or hair color.
8. Rock formed by sediment that is deposited in layers and formed over time. Fossils are often found in this type of rock.
10. Things that let electricity through easily (often metals).
12. The ability to do work or cause changes in matter.
13. The process of moving sediment from one place to another.
14. The part of an experiment that is changed.
15. A behavior that an animal develops by observing other animals or by being taught.

DOWN

2. A change in the body or behavior of a species over a long period of time to help it survive in its environment.
4. Light bouncing off of an object.
5. The remains of plants and animals buried in the Earth. Created by millions of years of heat and pressure. Examples include coal, oil, and natural gas.
6. The process of dropping or depositing sediment in a new place.
7. The bending of light when it passes from one substance into a different substance.
9. A material that does not easily pass electrical or heat energy.
11. The part of the experiment that is kept the same.
