

Animal Life Cycles Crossword Puzzle 2

1. Using the Across and Down clues, write the correct words in the numbered grid below.

[illegible]

ACROSS

1. The changes that a living thing goes through during its life.
3. A quality that describes a living thing or an object.
6. Something an organism does to get the things it needs to live.
11. To move from one place to another in search of food, water, or warmer temperatures.
12. An animal with jointed legs that allow the animal to move around easily.
14. An animal that has wings and is covered with feathers.
17. A class of small arthropod animals that have three separate sections to their bodies.
18. Animal living on both land and water.

DOWN

2. No longer existing or living.
4. To go into a deep sleep to stay alive during the winter.
5. A way of hiding or disguising.
7. A way of behaving, thinking, or feeling that is not learned; you do not need to be taught how to do this.
8. The process of change from an immature form to an adult form in two or more distinct stages (ex: caterpillar to butterfly).
9. Vertebrates that live on land, scales cover body, lay eggs, cold blooded.
10. At risk of becoming extinct.
12. A body part or behavior that helps a living thing survive.
13. To make more living things of the same kind.
15. A feature that is passed from parent to their offspring.
16. An animal that has a backbone and hair (or fur); it feeds its young with milk.
