

# 5th Grade Science Vocabulary Crossword Puzzle Review 10

1. Using the Across and Down clues, write the correct words in the numbered grid below.

## ACROSS

3. A circuit that allows energy to flow through it.
9. A circuit that only has one path for energy to flow through.
11. A trait passed on from one generation to another such as eye color or hair color.
12. Any living thing.
13. Two or more substances put together that can be easily separated.
14. A circuit that has more than one path for energy to flow through.
15. Rock formed by sediment that is deposited in layers and formed over time. Fossils are often found in this type of rock.

## DOWN

1. Spinning on an axis; the Earth does one of these every 24 hours.
2. An organism that makes its own food using energy from the sun through a process called photosynthesis.
4. To sort into groups by characteristic or property.
5. A mixture of two or more substances dissolved to form one substance and is often difficult to separate.
6. Process in which plants give off water through their stomata.
7. Energy that uses vibrations to create sound.
8. Light bouncing off of an object.
10. The average weather conditions of a particular place over a long period of time.
