8th Grade Science Vocabulary Crossword Puzzle 1

1. Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

- 5. Energy being converted to another form of energy.
- 6. Equal forces that cause no change in motion.
- States that the acceleration of an object increases with increased force and decreases with increased mass.
- 11. The layer of Earth that houses the plates of Earth.
- 12. The amount of force needed to move an object in a certain direction.
- 13. Speed traveled in a certain direction.
- 14. Energy in motion.
- 15. Unequal forces that cause a change in motion.

DOWN

- States that every time one object exerts a force on another object, the second object exerts a force that is equal in size and opposite in direction back on the first
- 2. Energy that is stored.
- States that objects at rest remain at rest, and objects in motion remain in motion with the same velocity, unless acted on by an unbalanced forced.
- 4. The taffy-like layer of Earth that moves the plates.
- 7. The rate of change of the velocity of an object with respect to time.
- 8. Distance traveled in a certain amount of time.
- 10. The thin, outer most layer of Earth.
