

AP Biology Vocabulary Crossword Puzzle 22

1. Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

1. Any chromosome not considered as a sex chromosome, or is not involved in sex determination.
3. The movement of molecules across the cell membrane with the use of ATP.
5. A molecule that speeds up a chemical reaction by lowering the activation energy.
9. The foreign particles or substances that trigger an immune response.
10. A high energy molecule that can be split apart to release energy for many different processes in living things.
11. Plant hormones that lead to phototropism by elongating the dark side of the plant.
12. The maximum population size of the species that the environment can sustain indefinitely, given the food, habitat, water, and other necessities available in the environment.
13. Proteins made by the B cells that immobilize antigens.
14. The asexual reproduction in bacteria.

DOWN

2. The smallest of blood vessels that serve to distribute oxygenated blood from arteries to tissues of body and to feed deoxygenated blood from tissues back into veins.
3. An organism that makes its own food.
4. The part of an enzyme where the substrate will bind.
6. The 20 molecules that are held together by peptide bonds to make up proteins.
7. A chemical that can release or absorb hydrogen ions depending on the conditions and therefore can maintain the pH of a solution at a constant level.
8. The three nucleotide combination on the transfer RNA that matches up with the three letter on the messenger RNA.

autosomal chromosomes
autotroph
capillaries
active site
amino acids

auxins
active transport
buffer
carrying capacity
antigen

binary fission
anticodon
catalyst
ATP
antibodies
