

Biology Vocabulary Quiz 20

1. ___ Cold blooded. Cannot regulate its own body temperature.
A.food chain B.ectothermic C.excretion D.Electron Transport Chain
2. ___ A series of steps in which organisms transfer energy by eating and being eaten.
A.ectothermic B.food web C.flagellate D.food chain
3. ___ Process by which metabolic wastes are eliminated from the body.
A.food web B.ectothermic C.excretion D.genotype
4. ___ female or male reproductive organ that produces sex cells and hormones; ovary or testis.
A.food chain B.ecosystem C.gonad D.genetics
5. ___ A mature ovary of a flower that protects dormant seeds and aids in their dispersal.
A.Electron Transport Chain B.fruit C.gestation D.ectothermic
6. ___ Growth process from conception to birth.
A.food chain B.gestation C.ecosystem D.excretion
7. ___ A biological community of interacting organisms and their physical environment.
A.ecosystem B.epidermis C.gestation D.food web
8. ___ Outer layer of skin.
A.epidermis B.food web C.genotype D.food chain
9. ___ A segment of DNA on a chromosome that codes for a specific trait.
A.gestation B.flagellate C.food web D.gene
10. ___ The scientific study of heredity.
A.ectothermic B.food web C.genetics D.gene
11. ___ A sequence of electron carrier molecules (membrane proteins) that shuttle electrons during the redox reactions that release energy used to make ATP.
A.endothermic B.food chain C.food web D.Electron Transport Chain
12. ___ To whip; to lash.
A.gonad B.excretion C.gene D.flagellate
13. ___ Absorbs heat.
A.endothermic B.ecosystem C.genetics D.excretion
14. ___ A community of organisms where there are several interrelated food chains.
A.Electron Transport Chain B.genotype C.food web D.flagellate
15. ___ Genetic makeup of an organism.
A.excretion B.genotype C.genetics D.gestation
