

## Biology Vocabulary Quiz 23

- D The ability to regrow a missing part of the body.  
A.plasma membrane B.secondary succession C.respiration D.regeneration
- B Type of succession that occurs in an area that was only partially destroyed by disturbances.  
A.recessive allele B.secondary succession C.primary succession D.proteins
- C An allele that is masked when a dominant allele is present.  
A.pollen B.pollination C.recessive allele D.respiratory system
- D Nutrients the body uses to build and maintain its cells and tissues.  
A.species B.plasma membrane C.regeneration D.proteins
- C Succession that occurs on surfaces where no soil exists.  
A.quarternary consumer B.respiratory system C.primary succession D.pollen
- D A group of similar organisms that can breed and produce fertile offspring.  
A.proteins B.secondary succession C.secondary consumer D.species
- A An organism that eats primary consumers.  
A.secondary consumer B.population C.pollen D.respiration
- A Inhalation and exhalation of air.  
A.respiration B.pollination C.respiratory system D.pollen
- B An organism that eats producers.  
A.recessive allele B.primary consumer C.pollen D.secondary consumer
- C The organ system that brings oxygen to body cells and removes waste gas.  
A.respiration B.population C.respiratory system D.quarternary consumer
- A The transfer of pollen from male reproductive structures to female reproductive structures in plants.  
A.pollination B.population C.primary consumer D.primary succession
- B An organism that eats tertiary consumers.  
A.recessive allele B.quarternary consumer C.population D.respiration
- A A group of individuals that belong to the same species and live in the same area.  
A.population B.pollen C.quarternary consumer D.species
- D A selectively-permeable phospholipid bilayer forming the boundary of the cells.  
A.species B.regeneration C.primary succession D.plasma membrane
- A A fine dust that contains the sperm of seed-producing plants.  
A.pollen B.secondary consumer C.recessive allele D.respiratory system
