

Biology Vocabulary Quiz 32

- A A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.temperate grassland B.temperate forest C.skeletal system D.vaccine
- D Bottom portion of the heart, thicker walled and larger.
A.transpiration B.vaccine C.zooplankton D.ventricle
- C An organism that eats secondary consumers.
A.vaccine B.vacuole C.tertiary consumer D.temperate grassland
- A A close relationship between two species that benefits at least one of the species.
A.symbiosis B.taxonomy C.temperate grassland D.skeletal system
- A A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.vaccine B.taxonomy C.temperate forest D.temperate grassland
- D Evaporation of water from the leaves of a plant.
A.zygote B.ventricle C.skeletal system D.transpiration
- D Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.temperate grassland B.transformation C.skeletal system D.temperate forest
- C Tiny floating organisms that are either small animals or protozoa.
A.zygote B.tertiary consumer C.zooplankton D.tropical forest
- D The scientific study of how living things are classified.
A.transpiration B.transformation C.tertiary consumer D.taxonomy
- D Warm, long days; very diverse; over 200 cm of precipitation per year.
A.zooplankton B.virus C.transformation D.tropical forest
- B The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.ventricle B.zygote C.tropical forest D.skeletal system
- C A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.temperate forest B.virus C.transformation D.skeletal system
- C Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.ventricle B.vaccine C.vacuole D.taxonomy
- D A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.ventricle B.tertiary consumer C.transpiration D.virus
- B Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.taxonomy B.skeletal system C.virus D.ventricle
