

# Biology Vocabulary Crossword Puzzle 31

1. Using the Across and Down clues, write the correct words in the numbered grid below.

## ACROSS

- The ability to regrow a missing part of the body.
- The transfer of pollen from male reproductive structures to female reproductive structures in plants.
- An organism that eats primary consumers.
- Type of succession that occurs in an area that was only partially destroyed by disturbances.
- An organism that eats tertiary consumers.
- A fine dust that contains the sperm of seed-producing plants.
- An organism that eats producers.

## DOWN

- The organ system that brings oxygen to body cells and removes waste gas.
- Succession that occurs on surfaces where no soil exists.
- An allele that is masked when a dominant allele is present.
- Nutrients the body uses to build and maintain its cells and tissues.
- A selectively-permeable phospholipid bilayer forming the boundary of the cells.
- Inhalation and exhalation of air.
- A group of individuals that belong to the same species and live in the same area.
- A group of similar organisms that can breed and produce fertile offspring.

secondary succession  
quarternary consumer  
plasma membrane  
population

primary consumer  
proteins  
pollen  
primary succession

respiration  
recessive allele  
respiratory system  
pollination

regeneration  
secondary consumer  
species
