

Biology Vocabulary Crossword Puzzle 7

1. Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

4. The transfer of pollen from male reproductive structures to female reproductive structures in plants.
5. An organism that eats tertiary consumers.
8. Type of succession that occurs in an area that was only partially destroyed by disturbances.
9. Inhalation and exhalation of air.
10. Nutrients the body uses to build and maintain its cells and tissues.
11. An allele that is masked when a dominant allele is present.
12. Succession that occurs on surfaces where no soil exists.
13. An organism that eats producers.

DOWN

1. The organ system that brings oxygen to body cells and removes waste gas.
2. An organism that eats primary consumers.
3. A group of individuals that belong to the same species and live in the same area.
4. A selectively-permeable phospholipid bilayer forming the boundary of the cells.
6. The ability to regrow a missing part of the body.
7. A fine dust that contains the sperm of seed-producing plants.
8. A group of similar organisms that can breed and produce fertile offspring.

primary succession

respiratory system

secondary consumer

population

secondary succession

pollination

recessive allele

pollen

primary consumer

respiration

regeneration

plasma membrane

quarternary consumer

species

proteins
