

# Biology Vocabulary Matching 23

Write the word that best matches each definition or clue.

- |                                |   |
|--------------------------------|---|
| 1. <u>PRIMARY CONSUMER</u>     | An organism that eats producers.  |
| 2. <u>REGENERATION</u>         | The ability to regrow a missing part of the body.   |
| 3. <u>RESPIRATION</u>          | Inhalation and exhalation of air.   |
| 4. <u>POLLINATION</u>          | The transfer of pollen from male reproductive structures to female reproductive structures in plants. |
| 5. <u>QUARTERNARY CONSUMER</u> | An organism that eats tertiary consumers.   |
| 6. <u>PLASMA MEMBRANE</u>      | A selectively-permeable phospholipid bilayer forming the boundary of the cells.                       |
| 7. <u>SECONDARY CONSUMER</u>   | An organism that eats primary consumers.  |
| 8. <u>SECONDARY SUCCESSION</u> | Type of succession that occurs in an area that was only partially destroyed by disturbances.          |
| 9. <u>SPECIES</u>              | A group of similar organisms that can breed and produce fertile offspring.                            |
| 10. <u>PROTEINS</u>            | Nutrients the body uses to build and maintain its cells and tissues.                                  |
| 11. <u>POLLEN</u>              | A fine dust that contains the sperm of seed-producing plants.   |
| 12. <u>POPULATION</u>          | A group of individuals that belong to the same species and live in the same area.                     |
| 13. <u>PRIMARY SUCCESSION</u>  | Succession that occurs on surfaces where no soil exists.  |
| 14. <u>RECESSIVE ALLELE</u>    | An allele that is masked when a dominant allele is present.   |
| 15. <u>RESPIRATORY SYSTEM</u>  | The organ system that brings oxygen to body cells and removes waste gas.                              |

secondary consumer

pollination

proteins

secondary succession

respiratory system

quarternary consumer

plasma membrane

species

pollen

primary consumer

primary succession

recessive allele

population

respiration

regeneration
