

Biology Vocabulary Matching 31

Write the word that best matches each definition or clue.

- | | |
|---------------------------------|---|
| 1. <u>PRIMARY SUCCESSION</u> | Succession that occurs on surfaces where no soil exists. |
| 2. <u>POPULATION</u> | A group of individuals that belong to the same species and live in the same area. |
| 3. <u>PLASMA MEMBRANE</u> | A selectively-permeable phospholipid bilayer forming the boundary of the cells. |
| 4. <u>SECONDARY CONSUMER</u> | An organism that eats primary consumers. |
| 5. <u>POLLINATION</u> | The transfer of pollen from male reproductive structures to female reproductive structures in plants. |
| 6. <u>REGENERATION</u> | The ability to regrow a missing part of the body. |
| 7. <u>POLLEN</u> | A fine dust that contains the sperm of seed-producing plants. |
| 8. <u>SECONDARY SUCCESSION</u> | Type of succession that occurs in an area that was only partially destroyed by disturbances. |
| 9. <u>PROTEINS</u> | Nutrients the body uses to build and maintain its cells and tissues. |
| 10. <u>RESPIRATORY SYSTEM</u> | The organ system that brings oxygen to body cells and removes waste gas. |
| 11. <u>SPECIES</u> | A group of similar organisms that can breed and produce fertile offspring. |
| 12. <u>RECESSIVE ALLELE</u> | An allele that is masked when a dominant allele is present. |
| 13. <u>PRIMARY CONSUMER</u> | An organism that eats producers. |
| 14. <u>QUARternary CONSUMER</u> | An organism that eats tertiary consumers. |
| 15. <u>RESPIRATION</u> | Inhalation and exhalation of air. |

secondary succession

recessive allele

pollen

regeneration

primary consumer

quarternary consumer

plasma membrane

species

proteins

pollination

population

respiration

respiratory system

primary succession

secondary consumer
