

Biology Vocabulary Review Crossword Puzzle 3

1. Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

2. Evaporation of water from the leaves of a plant.
3. Tiny floating organisms that are either small animals or protozoa.
4. A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
6. A close relationship between two species that benefits at least one of the species.
9. The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
14. A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
17. A tiny, nonliving particle that invades and then reproduces inside a living cell.
18. Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
19. Tiny floating organisms that are either small animals or protozoa.
20. Bottom portion of the heart, thicker walled and larger.
21. Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
22. The scientific study of how living things are classified.

zooplankton

DOWN

1. A tiny, nonliving particle that invades and then reproduces inside a living cell.
2. Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
5. The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
7. Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
8. A change in genotype and phenotype due to the assimilation of external DNA by a cell.
10. An organism that eats secondary consumers.
11. A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
12. Bottom portion of the heart, thicker walled and larger.
13. Warm, long days; very diverse; over 200 cm of precipitation per year.
14. Warm, long days; very diverse; over 200 cm of precipitation per year.
15. Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
16. Evaporation of water from the leaves of a plant.
