

Biology Vocabulary Test 11

- C Evaporation of water from the leaves of a plant.
A.zooplankton B.ventricle C.transpiration D.zygote
- D Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.temperate forest B.vaccine C.transpiration D.skeletal system
- B An organism that eats secondary consumers.
A.transformation B.tertiary consumer C.skeletal system D.temperate forest
- A A close relationship between two species that benefits at least one of the species.
A.symbiosis B.temperate grassland C.zooplankton D.skeletal system
- D Warm, long days; very diverse; over 200 cm of precipitation per year.
A.skeletal system B.temperate grassland C.taxonomy D.tropical forest
- B Bottom portion of the heart, thicker walled and larger.
A.skeletal system B.ventricle C.zooplankton D.temperate grassland
- A Tiny floating organisms that are either small animals or protozoa.
A.zooplankton B.tertiary consumer C.temperate grassland D.virus
- B The scientific study of how living things are classified.
A.temperate grassland B.taxonomy C.ventricle D.zooplankton
- B The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.tertiary consumer B.zygote C.vaccine D.ventricle
- B A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.taxonomy B.transformation C.tropical forest D.zooplankton
- B A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.temperate grassland B.vaccine C.tertiary consumer D.transpiration
- A Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.temperate forest B.temperate grassland C.virus D.ventricle
- D A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.temperate forest B.ventricle C.transformation D.virus
- C A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.vacuole B.taxonomy C.temperate grassland D.symbiosis
- C Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.tertiary consumer B.transformation C.vacuole D.temperate grassland

-
16. B Evaporation of water from the leaves of a plant.
A.tropical forest B.transpiration C.zooplankton D.symbiosis
17. B Bottom portion of the heart, thicker walled and larger.
A.zooplankton B.ventricle C.skeletal system D.transformation
18. A A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.transformation B.symbiosis C.tertiary consumer D.ventricle
19. D A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.temperate forest B.tropical forest C.symbiosis D.vaccine
20. D Warm, long days; very diverse; over 200 cm of precipitation per year.
A.virus B.taxonomy C.vaccine D.tropical forest
21. A The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.zygote B.transformation C.virus D.taxonomy
22. D Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.tropical forest B.taxonomy C.zygote D.vacuole
23. B Tiny floating organisms that are either small animals or protozoa.
A.taxonomy B.zooplankton C.transpiration D.transformation
24. D Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.temperate grassland B.virus C.ventricle D.temperate forest
25. A An organism that eats secondary consumers.
A.tertiary consumer B.zooplankton C.transpiration D.symbiosis
26. B The scientific study of how living things are classified.
A.vaccine B.taxonomy C.skeletal system D.ventricle
27. B A close relationship between two species that benefits at least one of the species.
A.temperate grassland B.symbiosis C.taxonomy D.vaccine
28. A A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.temperate grassland B.virus C.vacuole D.zygote
29. C A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.symbiosis B.transpiration C.virus D.ventricle
30. A Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.skeletal system B.zooplankton C.vacuole D.ventricle
