

Biology Vocabulary Test 12

1. A A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.temperate grassland B.vacuole C.tertiary consumer D.vaccine
2. D The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.ventricle B.transpiration C.virus D.zygote
3. A A close relationship between two species that benefits at least one of the species.
A.symbiosis B.vacuole C.taxonomy D.transpiration
4. C Tiny floating organisms that are either small animals or protozoa.
A.ventricle B.tertiary consumer C.zooplankton D.temperate grassland
5. C Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.virus B.vaccine C.temperate forest D.vacuole
6. B A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.temperate forest B.virus C.ventricle D.vaccine
7. C Evaporation of water from the leaves of a plant.
A.taxonomy B.temperate grassland C.transpiration D.tertiary consumer
8. A Bottom portion of the heart, thicker walled and larger.
A.ventricle B.tertiary consumer C.virus D.tropical forest
9. A Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.skeletal system B.vaccine C.virus D.tropical forest
10. B The scientific study of how living things are classified.
A.zygote B.taxonomy C.tropical forest D.temperate forest
11. C A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.zygote B.temperate grassland C.transformation D.zooplankton
12. A Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.vacuole B.skeletal system C.virus D.tertiary consumer
13. A An organism that eats secondary consumers.
A.tertiary consumer B.vacuole C.temperate forest D.vaccine
14. A A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.vaccine B.tropical forest C.ventricle D.virus
15. B Warm, long days; very diverse; over 200 cm of precipitation per year.
A.symbiosis B.tropical forest C.temperate grassland D.taxonomy

-
16. A The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.zygote B.tertiary consumer C.transpiration D.tropical forest
17. B Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.taxonomy B.skeletal system C.ventricle D.tropical forest
18. B A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.ventricle B.temperate grassland C.vaccine D.transformation
19. A A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.virus B.symbiosis C.transformation D.zygote
20. D An organism that eats secondary consumers.
A.vaccine B.temperate grassland C.transpiration D.tertiary consumer
21. D Evaporation of water from the leaves of a plant.
A.taxonomy B.tropical forest C.virus D.transpiration
22. A Bottom portion of the heart, thicker walled and larger.
A.ventricle B.vacuole C.tropical forest D.transpiration
23. C A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.vacuole B.tertiary consumer C.transformation D.zooplankton
24. D A close relationship between two species that benefits at least one of the species.
A.ventricle B.transpiration C.virus D.symbiosis
25. A A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.vaccine B.transpiration C.vacuole D.ventricle
26. A Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.vacuole B.ventricle C.symbiosis D.tertiary consumer
27. B Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.vaccine B.temperate forest C.skeletal system D.transpiration
28. B Warm, long days; very diverse; over 200 cm of precipitation per year.
A.zooplankton B.tropical forest C.temperate forest D.symbiosis
29. B Tiny floating organisms that are either small animals or protozoa.
A.symbiosis B.zooplankton C.vaccine D.transformation
30. B The scientific study of how living things are classified.
A.transformation B.taxonomy C.tertiary consumer D.ventricle
