Biology Vocabulary Test 12

1.		A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert. A.temperate grassland B.vacuole C.tertiary consumer D.vaccine
2.		The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo. A.ventricle B.transpiration C.virus D.zygote
3.		A close relationship between two species that benefits at least one of the species. A.symbiosis B.vacuole C.taxonomy D.transpiration
4.		Tiny floating organisms that are either small animals or protozoa. A.ventricle B.tertiary consumer C.zooplankton D.temperate grassland
5.	_	Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm. A.virus B.vaccine C.temperate forest D.vacuole
6.		A tiny, nonliving particle that invades and then reproduces inside a living cell. A.temperate forest B.virus C.ventricle D.vaccine
7.	_	Evaporation of water from the leaves of a plan. A.taxonomy B.temperate grassland C.transpiration D.tertiary consumer
8.		Bottom portion of the heart, thicker walled and larger. A.ventricle B.tertiary consumer C.virus D.tropical forest
9.	_	Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints. A.skeletal system B.vaccine C.virus D.tropical forest
10.	_	The scientific study of how living things are classified. A.zygote B.taxonomy C.tropical forest D.temperate forest
11.		A change in genotype and phenotype due to the assimilation of external DNA by a cell. A.zygote B.temperate grassland C.transformation D.zooplankton
12.		Cell organelle that stores materials such as water, salts, proteins, and carbohydrates. A.vacuole B.skeletal system C.virus D.tertiary consumer
13.		An organism that eats secondary consumers. A.tertiary consumer B.vacuole C.temperate forest D.vaccine
14.	_	A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen. A.vaccine B.tropical forest C.ventricle D.virus
15.		Warm, long days; very diverse; over 200 cm of precipitation per year. A.symbiosis B.tropical forest C.temperate grassland D.taxonomy

16	The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo. A.zygote B.tertiary consumer C.transpiration D.tropical forest
17	Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints. A.taxonomy B.skeletal system C.ventricle D.tropical forest
18	A community (or biome) that is dominated by grasses, has few trees, and is characterized by color winters and rainfall that is intermediate between that of a forest and a desert. A.ventricle B.temperate grassland C.vaccine D.transformation
19	A tiny, nonliving particle that invades and then reproduces inside a living cell. A.virus B.symbiosis C.transformation D.zygote
20	An organism that eats secondary consumers. A.vaccine B.temperate grassland C.transpiration D.tertiary consumer
	Evaporation of water from the leaves of a plan. A.taxonomy B.tropical forest C.virus D.transpiration
22	Bottom portion of the heart, thicker walled and larger. A.ventricle B.vacuole C.tropical forest D.transpiration
23	A change in genotype and phenotype due to the assimilation of external DNA by a cell. A.vacuole B.tertiary consumer C.transformation D.zooplankton
24	A close relationship between two species that benefits at least one of the species. A.ventricle B.transpiration C.virus D.symbiosis
25	A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen. A.vaccine B.transpiration C.vacuole D.ventricle
26	Cell organelle that stores materials such as water, salts, proteins, and carbohydrates. A.vacuole B.ventricle C.symbiosis D.tertiary consumer
27	Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm. A.vaccine B.temperate forest C.skeletal system D.transpiration
28	Warm, long days; very diverse; over 200 cm of precipitation per year. A.zooplankton B.tropical forest C.temperate forest D.symbiosis
29	Tiny floating organisms that are either small animals or protozoa. A.symbiosis B.zooplankton C.vaccine D.transformation
30	The scientific study of how living things are classified. A.transformation B.taxonomy C.tertiary consumer D.ventricle
