

Biology Vocabulary Test 4

- B Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.symbiosis B.temperate forest C.zygote D.tertiary consumer
- B A close relationship between two species that benefits at least one of the species.
A.temperate grassland B.symbiosis C.taxonomy D.transpiration
- A Warm, long days; very diverse; over 200 cm of precipitation per year.
A.tropical forest B.zygote C.taxonomy D.transformation
- C A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.vacuole B.skeletal system C.vaccine D.transformation
- D A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.ventricle B.vaccine C.vacuole D.transformation
- D The scientific study of how living things are classified.
A.virus B.transformation C.temperate grassland D.taxonomy
- D Tiny floating organisms that are either small animals or protozoa.
A.virus B.tropical forest C.temperate forest D.zooplankton
- D A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.vacuole B.tertiary consumer C.vaccine D.virus
- B Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.transpiration B.skeletal system C.symbiosis D.ventricle
- A A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.temperate grassland B.zygote C.ventricle D.taxonomy
- D The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.virus B.vaccine C.tertiary consumer D.zygote
- D Bottom portion of the heart, thicker walled and larger.
A.taxonomy B.tropical forest C.temperate forest D.ventricle
- A Evaporation of water from the leaves of a plant.
A.transpiration B.tropical forest C.ventricle D.temperate forest
- A Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.vacuole B.tropical forest C.temperate grassland D.ventricle
- C An organism that eats secondary consumers.
A.ventricle B.symbiosis C.tertiary consumer D.zooplankton

-
16. B Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.zygote B.skeletal system C.tropical forest D.virus
17. D A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.zygote B.taxonomy C.temperate forest D.virus
18. A The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.zygote B.vaccine C.zooplankton D.transpiration
19. B The scientific study of how living things are classified.
A.virus B.taxonomy C.zooplankton D.symbiosis
20. D A close relationship between two species that benefits at least one of the species.
A.skeletal system B.virus C.zooplankton D.symbiosis
21. A Evaporation of water from the leaves of a plant.
A.transpiration B.zooplankton C.virus D.taxonomy
22. D A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.symbiosis B.temperate forest C.virus D.temperate grassland
23. D Bottom portion of the heart, thicker walled and larger.
A.skeletal system B.symbiosis C.vaccine D.ventricle
24. B An organism that eats secondary consumers.
A.transformation B.tertiary consumer C.transpiration D.taxonomy
25. D Warm, long days; very diverse; over 200 cm of precipitation per year.
A.vaccine B.vacuole C.zooplankton D.tropical forest
26. A A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.transformation B.transpiration C.virus D.zooplankton
27. A Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.vacuole B.tropical forest C.zygote D.zooplankton
28. A Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.temperate forest B.symbiosis C.tertiary consumer D.transformation
29. C A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.transformation B.temperate forest C.vaccine D.skeletal system
30. D Tiny floating organisms that are either small animals or protozoa.
A.temperate forest B.transformation C.vaccine D.zooplankton
