

Biology Vocabulary Test 6

1. B An organism that eats secondary consumers.
A.virus B.tertiary consumer C.transformation D.zygote
2. B Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.vaccine B.vacuole C.ventricle D.skeletal system
3. C Tiny floating organisms that are either small animals or protozoa.
A.zygote B.ventricle C.zooplankton D.tertiary consumer
4. B A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.zooplankton B.virus C.transformation D.transpiration
5. A The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.zygote B.vaccine C.symbiosis D.ventricle
6. B Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.tertiary consumer B.skeletal system C.tropical forest D.zooplankton
7. A A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.vaccine B.transpiration C.taxonomy D.virus
8. C Bottom portion of the heart, thicker walled and larger.
A.tropical forest B.skeletal system C.ventricle D.vacuole
9. A A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.transformation B.transpiration C.zygote D.symbiosis
10. A A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.temperate grassland B.skeletal system C.transformation D.vaccine
11. B The scientific study of how living things are classified.
A.transformation B.taxonomy C.tertiary consumer D.zygote
12. B Warm, long days; very diverse; over 200 cm of precipitation per year.
A.taxonomy B.tropical forest C.transformation D.tertiary consumer
13. D Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.vacuole B.zooplankton C.symbiosis D.temperate forest
14. B A close relationship between two species that benefits at least one of the species.
A.ventricle B.symbiosis C.taxonomy D.tertiary consumer
15. A Evaporation of water from the leaves of a plant.
A.transpiration B.vaccine C.temperate grassland D.ventricle

-
16. A Evaporation of water from the leaves of a plant.
A.transpiration B.transformation C.vacuole D.zooplankton
17. C Bottom portion of the heart, thicker walled and larger.
A.symbiosis B.temperate grassland C.ventricle D.taxonomy
18. B A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.transpiration B.temperate grassland C.zooplankton D.symbiosis
19. A Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.temperate forest B.tertiary consumer C.transpiration D.vacuole
20. D The scientific study of how living things are classified.
A.vaccine B.virus C.tertiary consumer D.taxonomy
21. C Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.ventricle B.temperate grassland C.vacuole D.zygote
22. B Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.symbiosis B.skeletal system C.ventricle D.temperate forest
23. B The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.transpiration B.zygote C.temperate grassland D.tertiary consumer
24. A A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.transformation B.symbiosis C.ventricle D.tropical forest
25. C A close relationship between two species that benefits at least one of the species.
A.transpiration B.zygote C.symbiosis D.vacuole
26. C Tiny floating organisms that are either small animals or protozoa.
A.ventricle B.symbiosis C.zooplankton D.temperate grassland
27. C A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.ventricle B.transpiration C.vaccine D.skeletal system
28. B An organism that eats secondary consumers.
A.symbiosis B.tertiary consumer C.taxonomy D.transformation
29. A Warm, long days; very diverse; over 200 cm of precipitation per year.
A.tropical forest B.transpiration C.virus D.tertiary consumer
30. C A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.vaccine B.tertiary consumer C.virus D.temperate forest
