

# Biology Vocabulary Test 7

- A The scientific study of how living things are classified.  
A.taxonomy B.virus C.symbiosis D.temperate forest
- C An organism that eats secondary consumers.  
A.vaccine B.zooplankton C.tertiary consumer D.temperate grassland
- C A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.  
A.virus B.skeletal system C.vaccine D.temperate grassland
- A Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.  
A.vacuole B.transpiration C.taxonomy D.tropical forest
- C Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.  
A.temperate forest B.taxonomy C.skeletal system D.ventricle
- B A close relationship between two species that benefits at least one of the species.  
A.skeletal system B.symbiosis C.vaccine D.tertiary consumer
- A A tiny, nonliving particle that invades and then reproduces inside a living cell.  
A.virus B.zooplankton C.tropical forest D.ventricle
- D Bottom portion of the heart, thicker walled and larger.  
A.tertiary consumer B.zygote C.vacuole D.ventricle
- D A change in genotype and phenotype due to the assimilation of external DNA by a cell.  
A.ventricle B.skeletal system C.temperate forest D.transformation
- D Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.  
A.taxonomy B.vacuole C.temperate grassland D.temperate forest
- C Evaporation of water from the leaves of a plant.  
A.temperate forest B.taxonomy C.transpiration D.transformation
- D A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.  
A.vacuole B.zygote C.ventricle D.temperate grassland
- B The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.  
A.taxonomy B.zygote C.zooplankton D.symbiosis
- D Tiny floating organisms that are either small animals or protozoa.  
A.skeletal system B.symbiosis C.zygote D.zooplankton
- D Warm, long days; very diverse; over 200 cm of precipitation per year.  
A.virus B.temperate forest C.transformation D.tropical forest

- 
16. A The scientific study of how living things are classified.  
A.taxonomy B.temperate forest C.transformation D.skeletal system
17. B A tiny, nonliving particle that invades and then reproduces inside a living cell.  
A.temperate forest B.virus C.ventricle D.symbiosis
18. D Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.  
A.vaccine B.virus C.tropical forest D.temperate forest
19. B Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.  
A.tropical forest B.vacuole C.tertiary consumer D.zygote
20. B An organism that eats secondary consumers.  
A.ventricle B.tertiary consumer C.zygote D.tropical forest
21. D Evaporation of water from the leaves of a plant.  
A.transformation B.zygote C.vacuole D.transpiration
22. B Tiny floating organisms that are either small animals or protozoa.  
A.temperate forest B.zooplankton C.zygote D.virus
23. A Bottom portion of the heart, thicker walled and larger.  
A.ventricle B.symbiosis C.vacuole D.temperate grassland
24. B A change in genotype and phenotype due to the assimilation of external DNA by a cell.  
A.skeletal system B.transformation C.zygote D.taxonomy
25. B A close relationship between two species that benefits at least one of the species.  
A.vacuole B.symbiosis C.temperate forest D.taxonomy
26. D Warm, long days; very diverse; over 200 cm of precipitation per year.  
A.symbiosis B.skeletal system C.vaccine D.tropical forest
27. D A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.  
A.transformation B.temperate grassland C.symbiosis D.vaccine
28. C Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.  
A.vacuole B.zygote C.skeletal system D.zooplankton
29. D The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.  
A.temperate grassland B.zooplankton C.virus D.zygote
30. A A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.  
A.temperate grassland B.vacuole C.zygote D.tropical forest
