

Biology Vocabulary Test 9

- A Bottom portion of the heart, thicker walled and larger.
A.ventricle B.vacuole C.zooplankton D.transpiration
- B The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.temperate grassland B.zygote C.taxonomy D.symbiosis
- A Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.vacuole B.virus C.vaccine D.transformation
- D Tiny floating organisms that are either small animals or protozoa.
A.tertiary consumer B.ventricle C.zygote D.zooplankton
- C Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.vaccine B.zooplankton C.skeletal system D.temperate grassland
- B A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.taxonomy B.virus C.symbiosis D.temperate grassland
- B A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.transformation B.vaccine C.transpiration D.temperate forest
- D A close relationship between two species that benefits at least one of the species.
A.transformation B.transpiration C.vaccine D.symbiosis
- B An organism that eats secondary consumers.
A.temperate forest B.tertiary consumer C.transformation D.vacuole
- A Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.temperate forest B.transformation C.vaccine D.vacuole
- D Warm, long days; very diverse; over 200 cm of precipitation per year.
A.transpiration B.zygote C.virus D.tropical forest
- D A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.virus B.transpiration C.zygote D.transformation
- A A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.temperate grassland B.tertiary consumer C.vacuole D.symbiosis
- B Evaporation of water from the leaves of a plant.
A.taxonomy B.transpiration C.transformation D.vaccine
- B The scientific study of how living things are classified.
A.virus B.taxonomy C.symbiosis D.zooplankton

-
16. B Warm, long days; very diverse; over 200 cm of precipitation per year.
A.ventricle B.tropical forest C.tertiary consumer D.virus
17. C A change in genotype and phenotype due to the assimilation of external DNA by a cell.
A.tropical forest B.tertiary consumer C.transformation D.vaccine
18. C A tiny, nonliving particle that invades and then reproduces inside a living cell.
A.tropical forest B.symbiosis C.virus D.vaccine
19. D Bottom portion of the heart, thicker walled and larger.
A.zooplankton B.zygote C.skeletal system D.ventricle
20. C The scientific study of how living things are classified.
A.vaccine B.temperate forest C.taxonomy D.zygote
21. C Protects and supports body organs and provides a framework the muscles use to support movement. Made up of bones and joints.
A.zygote B.taxonomy C.skeletal system D.virus
22. D A close relationship between two species that benefits at least one of the species.
A.zygote B.virus C.temperate forest D.symbiosis
23. D Cell organelle that stores materials such as water, salts, proteins, and carbohydrates.
A.virus B.skeletal system C.vaccine D.vacuole
24. A An organism that eats secondary consumers.
A.tertiary consumer B.transpiration C.taxonomy D.vaccine
25. C The fertilized egg; it enters a 2-week period of rapid cell division and develops into an embryo.
A.zooplankton B.skeletal system C.zygote D.virus
26. D Tiny floating organisms that are either small animals or protozoa.
A.tropical forest B.tertiary consumer C.zygote D.zooplankton
27. C Evaporation of water from the leaves of a plant.
A.skeletal system B.temperate grassland C.transpiration D.transformation
28. C Biome characterized by broad-leaved, deciduous trees, well-defined seasons, and average yearly precipitation of 75-150 cm.
A.transpiration B.zygote C.temperate forest D.taxonomy
29. C A harmless variant or derivative of a pathogen that stimulates a host's immune system to mount defenses against the pathogen.
A.skeletal system B.vacuole C.vaccine D.zooplankton
30. D A community (or biome) that is dominated by grasses, has few trees, and is characterized by cold winters and rainfall that is intermediate between that of a forest and a desert.
A.taxonomy B.transpiration C.skeletal system D.temperate grassland
