- A characteristic or behavior that helps a living thing survive.
- Behaviors that are learned through experience.
- Organisms with warm blood, who drink milk, and sweat when it's warm.
- The series of changes in the life of an organism including reproduction.
- A vertebrate animal of a class that includes snakes, lizards, crocodiles, turtles, and tortoises. They are distinguished by having a dry scaly skin and typically laying soft-shelled eggs on land.
- The use of any combination of materials, coloration, or illumination for concealment (being hidden), either by making animals, humans, or objects hard to see, or by disguising them as something else.
- Organisms that hatch from eggs, have wings and feathers.
- Organisms born in the water and have gills that become lungs.
- The transfer of pollen to a stigma, ovule, flower, or plant to allow fertilization.
- Traits that are passed down from parents to their offspring.
- A limbless cold-blooded vertebrate animal with gills and fins and lives wholly in water.
- Seasonal movement of animals from one region to another.
- To arrange or sort objects according to their shared characteristics.
