

4th Grade Science Word Search 13

1. First, write the correct clue number to the left of each word in the Word Bank. Then, circle the words that have been hidden vertically, horizontally, and diagonally.

1. All living and nonliving things in an environment and the many ways that they interact with each other.
2. Organisms that make their own food.
3. Any form of water that falls back to earth.
4. The area where an organism lives.
5. Organisms that eat other living things.
6. When vapor cools and changes into droplets of water.
7. A nearly incompressible fluid that conforms to the shape of its container but retains a (nearly) constant volume independent of pressure.
8. Water held underground in the soil or in pores and crevices in rock.
9. Water that goes off of the land and collects in rivers, lakes, and the ocean.
10. A state of matter with a definite shape and volume.
11. Energy from the sun heats liquid water and the water changes to water vapor.
12. Organisms that break down plant and animal remains.
13. A state of matter consisting of particles that have neither a defined volume nor defined shape.
