

## 4th Grade Science Word Search 2

1. First, write the correct clue number to the left of each word in the Word Bank. Then, circle the words that have been hidden vertically, horizontally, and diagonally.

- The action of surface processes that removes soil, rock, or dissolved material from one location on the Earth's crust, and then transports it to another location where it is deposited.
- The process of earth's materials breaking down into smaller pieces.
- The amount of space that matter takes up.
- The spinning of earth on its axis.
- How tightly packed molecules are within a specific space.
- The water found at the Earth's surface in lakes, rivers, streams, ponds, and swamps.
- The movement of the Earth around the sun.
- The quantity of matter in a physical body (density x volume).
- Anything that takes up space and has mass.
- Natural, nonliving solid crystals that make up a substance.
- The geological process in which sediments, soil, and rocks are added to a landform or landmass.
- Vibrations that travel through the air or another medium and can be heard when they reach a person's or animal's ear.
- Imaginary Line that goes through the center of the Earth.
