|--|--|
| 1. Seasonal movement of animals from one region to another.  | 8. Behaviors that are learned through experience.  |
| 2. A limbless cold-blooded vertebrate animal with gills and fins and lives wholly in water.  | 9. A vertebrate animal of a class that includes snakes, lizards, crocodiles, turtles, and tortoises. They are distinguished by having a dry scaly skin and typically laying soft-shelled eggs on land. |
| 3. Organisms with warm blood, who drink milk, and sweat when it's warm.  | 10. The series of changes in the life of an organism including reproduction.   |
| 4. Organisms that hatch from eggs, have wings and feathers.  | 11. To arrange or sort objects according to their shared characteristics.  |
| 5. The transfer of pollen to a stigma, ovule, flower, or plant to allow fertilization.   | 12. Organisms born in the water and have gills that become lungs.  |
| 6. Traits that are passed down from parents to their offspring.  | 13. A characteristic or behavior that helps a living thing survive.  |
| 7. The use of any combination of materials, coloration, or illumination for concealment (being hidden), either by making animals, humans, or objects hard to see, or by disguising them as something else. |  |
