

5th Grade Science Vocabulary Quiz 14

- ___ Temperature at which a substance changes from liquid to solid.
A.gravity B.solution C.water cycle D.freezing point
- ___ Temperature at which a substance changes from solid to liquid.
A.property B.rotation C.water cycle D.melting point
- ___ The day-to-day conditions in a particular place that include precipitation, temperature, air pressure, and wind.
A.gravity B.property C.weather D.investigation
- ___ The average weather conditions of a particular place over a long period of time.
A.water cycle B.climate C.property D.rotation
- ___ A characteristic that can be observed or measured.
A.representation B.boiling point C.property D.volume
- ___ A sign or symbol that stands for something else.
A.freezing point B.transpiration C.solution D.representation
- ___ The amount of space matter takes up.
A.rotation B.boiling point C.solution D.volume
- ___ The Sun's energy makes water evaporate into the air; water returns to the ground as rain or snow; the process repeats over and over again.
A.transpiration B.melting point C.volume D.water cycle
- ___ The force that pulls all objects in the universe towards each other.
A.climate B.boiling point C.gravity D.property
- ___ Temperature at which a substance changes from liquid to gas.
A.freezing point B.weather C.volume D.boiling point
- ___ Spinning on an axis; the Earth does one of these every 24 hours.
A.property B.mass C.freezing point D.rotation
- ___ Process in which plants give off water through their stomata.
A.property B.transpiration C.volume D.boiling point
- ___ A mixture of two or more substances dissolved to form one substance and is often difficult to separate.
A.investigation B.representation C.solution D.mass
- ___ The amount of matter in an object.
A.rotation B.freezing point C.transpiration D.mass
- ___ The process of discovering an answer to a problem or question using the scientific method.
A.volume B.melting point C.solution D.investigation
