

5th Grade Science Vocabulary Quiz 6

- ___ Process in which plants give off water through their stomata.
A.transpiration B.solution C.climate D.weather
- ___ The Sun's energy makes water evaporate into the air; water returns to the ground as rain or snow; the process repeats over and over again.
A.investigation B.water cycle C.solution D.representation
- ___ A characteristic that can be observed or measured.
A.property B.rotation C.water cycle D.boiling point
- ___ A mixture of two or more substances dissolved to form one substance and is often difficult to separate.
A.property B.investigation C.mass D.solution
- ___ The process of discovering an answer to a problem or question using the scientific method.
A.climate B.investigation C.freezing point D.melting point
- ___ The amount of space matter takes up.
A.transpiration B.investigation C.volume D.representation
- ___ The force that pulls all objects in the universe towards each other.
A.climate B.melting point C.weather D.gravity
- ___ Temperature at which a substance changes from liquid to gas.
A.volume B.boiling point C.water cycle D.climate
- ___ Spinning on an axis; the Earth does one of these every 24 hours.
A.melting point B.solution C.property D.rotation
- ___ Temperature at which a substance changes from liquid to solid.
A.freezing point B.property C.investigation D.representation
- ___ The average weather conditions of a particular place over a long period of time.
A.melting point B.solution C.climate D.freezing point
- ___ Temperature at which a substance changes from solid to liquid.
A.volume B.representation C.mass D.melting point
- ___ The amount of matter in an object.
A.weather B.rotation C.mass D.investigation
- ___ The day-to-day conditions in a particular place that include precipitation, temperature, air pressure, and wind.
A.melting point B.mass C.gravity D.weather
- ___ A sign or symbol that stands for something else.
A.freezing point B.representation C.boiling point D.weather
