T	R	A	N	S	P	I	R	A	T	I	O	N	U	U	U	M	P	F	U	S	N	G	I

- Spinning on an axis; the Earth does one of these every 24 hours.
- Temperature at which a substance changes from liquid to solid.
- Temperature at which a substance changes from solid to liquid.
- The amount of space matter takes up.
- The Sun's energy makes water evaporate into the air; water returns to the ground as rain or snow; the process repeats over and over again.
- A sign or symbol that stands for something else.
- Process in which plants give off water through their stomata.
- Temperature at which a substance changes from liquid to gas.
- The day-to-day conditions in a particular place that include precipitation, temperature, air pressure, and wind.
- A mixture of two or more substances dissolved to form one substance and is often difficult to separate.
- The average weather conditions of a particular place over a long period of time.
- A characteristic that can be observed or measured.
- The amount of matter in an object.
- The force that pulls all objects in the universe towards each other.
- The process of discovering an answer to a problem or question using the scientific method.

investigation  
property  
mass  
melting point

weather  
gravity  
solution  
volume

boiling point  
transpiration  
climate  
water cycle

freezing point  
representation  
rotation
