

6th Grade Science Word Search 1

1. First, write the correct clue number to the left of each word in the Word Bank. Then, circle the words that have been hidden vertically, horizontally, and diagonally.

1. Non-living.
2. The transfer of thermal energy from one substance to another through direct contact.
3. A testable prediction or possible explanation.
4. Living.
5. Energy cannot be created or destroyed.
6. A pure substance made of two or more elements chemically combined. Example: NaCl, H₂O.
7. A pure substance made of only one kind of atom that cannot be broken down.
8. The transfer of thermal energy by the circulation or movement of a liquid or gas. Heat rises and cold sinks.
9. The variety of species living in a given area.
10. All the living and nonliving things that interact in an area.
11. Reproduction accomplished by a single organism.
12. Basic unit of matter; smallest component of an element.
13. A push or a pull.
14. The cell is the basic unit of life; it is the smallest unit that is still considered a living thing. All things living are made out of cells.
15. Variable that is not changed in an experiment; the normal state.
16. Change of energy from one form to another, or the movement of energy from one object to another.
